## PUMP HOUSE MONITOR

Order Code: ZC-ADPHMS

SMS Fault Alert

Simplify Wiring

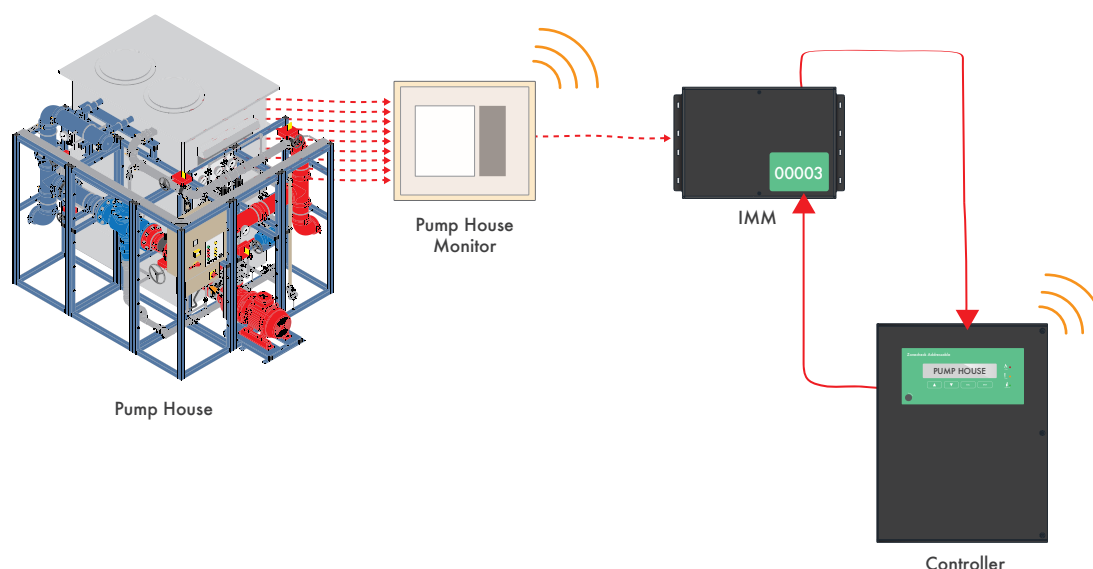

Pump House Monitoring

### Overview

The Pump House Monitor allows all pump house signals to be monitored 24/7 remotely via the Addressable controller. The Pump House Monitor can also utilise SMS to relay the information to the end user in the form of an intuitive SMS that can be read on the operators' mobile phone device. The module also uploads the information to a designated website.

### Typical Setup

### Kit Contents

- 1x Pump House IMM
- 1x Pump House Monitor

### Pump House Monitor

The standard 16 inputs to the Pump House Monitor (configured either n/o or n/c) are monitored locally via 16 very reliable and high intensity LEDs on the panel fascia. All 16 channels can be monitored remotely via a website and/or GSM/SMS text communication.
